

4.1 Access Route

4.1a Unobstructed access routes with tactile guide paths in contrasting colours to the surrounding flooring finishes

4.1b Access stair with adequate warnings — provision of tactile warning strips and contrasting nosing on steps

4.1c Accessible ramp at change in levels in an open space

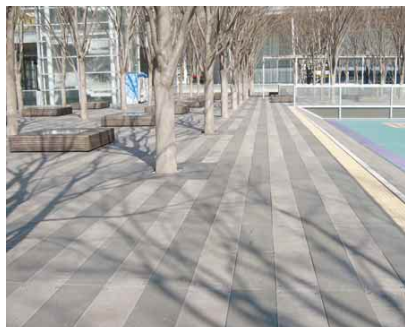

4.1d Access to information and services led by tactile guide paths

4.1e Use of different flooring materials to demarcate main access paths from the other functional areas

4.1f Channel grating arranged perpendicular to the travel path and with slots less than 13mm wide

4.1g Levelled raised flooring with drainage system concealed underneath

4.1h Surface drainage with floor drains — floor surface generally levelled and the drain cover flush with the surrounding flooring finishes

4.1i Travel experience enhanced by undulating pathways and floral planting
