Caritas Computer Refurbish Project

On behalf of Caritas, we would like to express our sincere gratitude to your organization's generous donations. We have received 21 Desktops, 3 Printers and 19 LCD Monitors from you on 10 November 2014.

Please be assured that we would try our best to refurbish the donation for reuse. The refurbished computers would all be deploying to narrow the digital barrier. Only the deprived people or non-profit making organizations would be eligible for procuring our products.

The thorough overhauled computers have mostly sold to our clients and non-governmental organizations at an affordable price. In the past 5 years, more than twenty thousand families have benefited from our programme. Students who had used our service for study purpose was the major beneficiary.

Besides, the unusable computers and unwanted parts we have received would be dismantled fully or partially in an environmental friendly way. The superfluous computers and accessories would be sold to government-registered recyclers. We will use the resulted income to cover the operation cost and to re-invest the surplus in service improvement.

We look forward to your continuous support by donating retired computers and accessories, sponsor some deprived groups and be our volunteers.

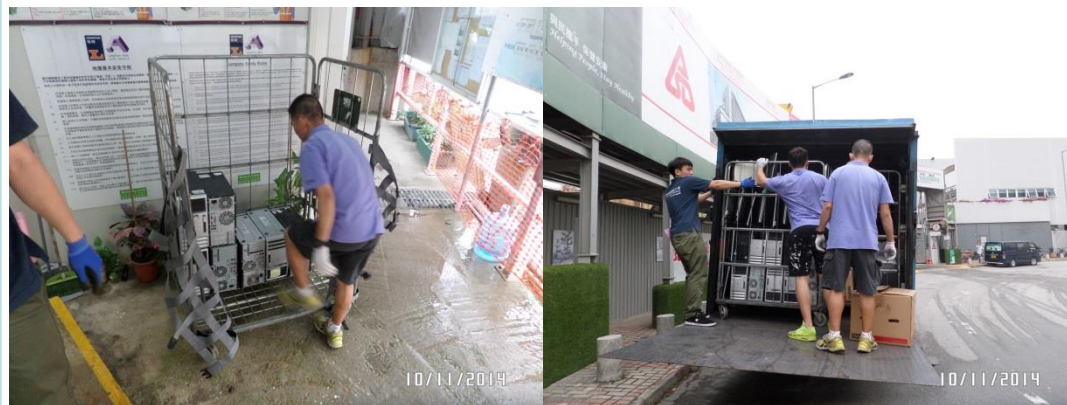

For any further cooperation in the future, please feel free to contact us at 2716 6875.

Wish you and your company every success.

Yours sincerely,

Cheung Chun Wai
 Supervisor

Donation of Old Computers to Caritas
