

Wastewater Control – Dewatering Bag System

Advanced Desludging

- Advantage of Dewatering bag:
- Reduce overuse of wastewater treatment plant
 - Increase the time of sedimentation
 - Better water quality

Wastewater Control – Dewatering Bag System

Post-filtration

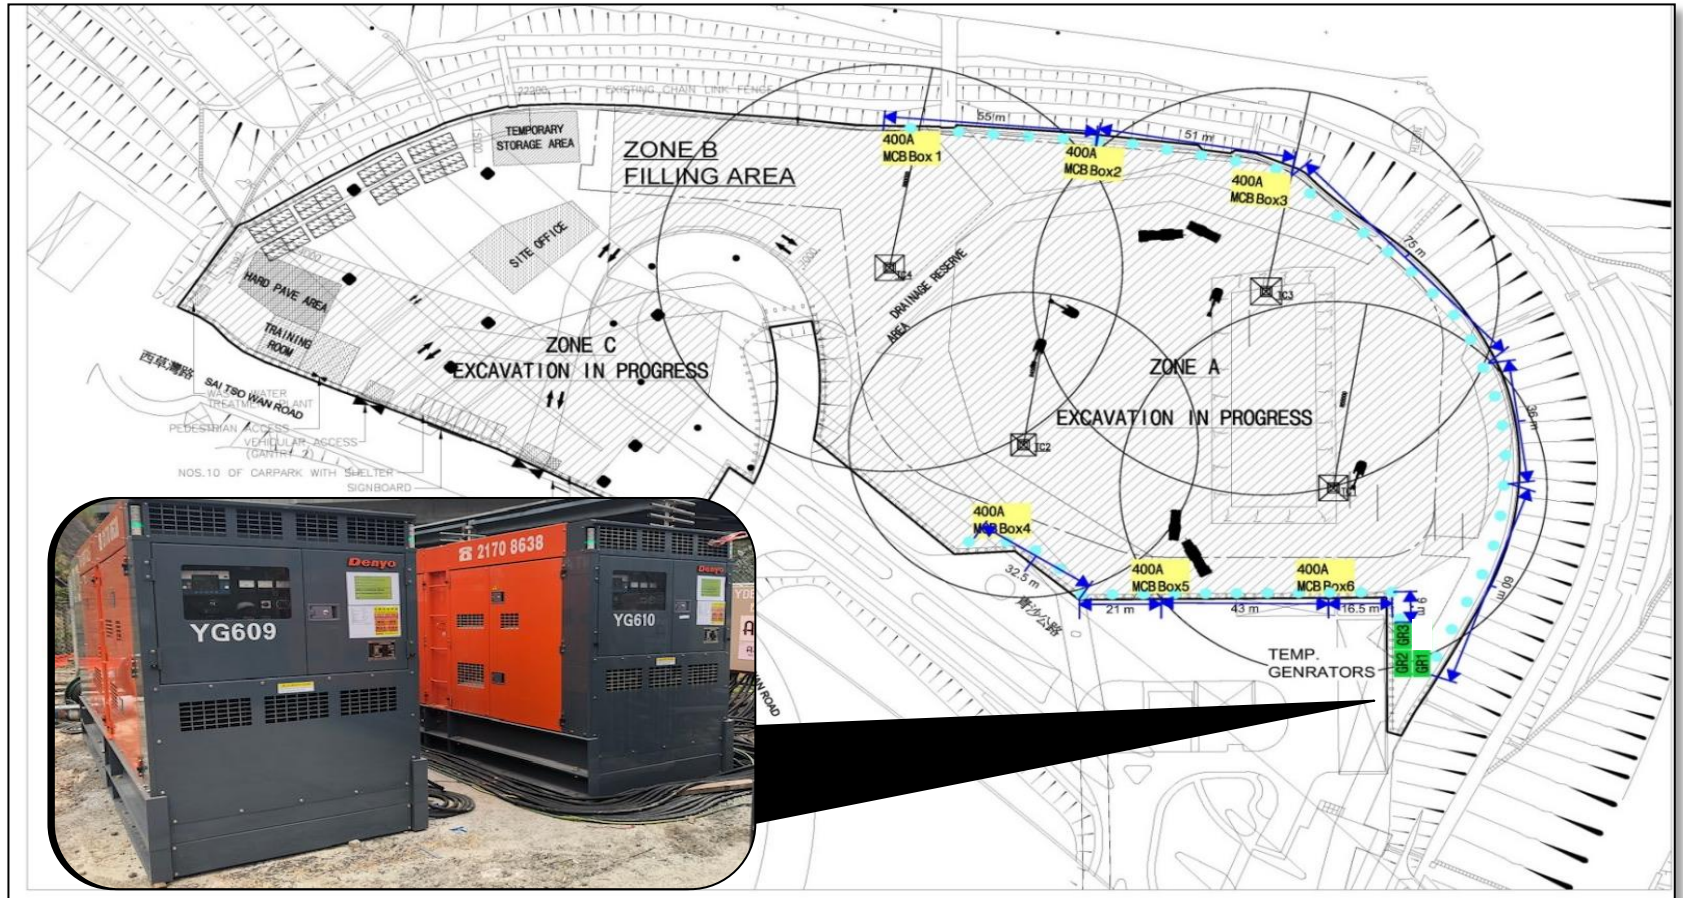

Pre-filtration

Energy Management – Automatic Power System (APS)

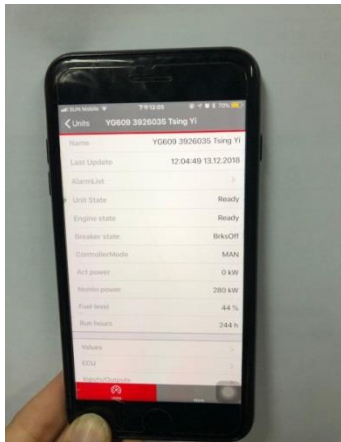

- Silent generators (QPME)
- Generators connected to provide energy network to whole site area
- Generators synchronized with load sharing
- Operate according to load demand

Energy Management – Automatic Power System (APS)

Advantage of APS

- Carbon emission reduction
- Reduce fuel consumption
- Zero downtime on electric power
- Remote monitoring

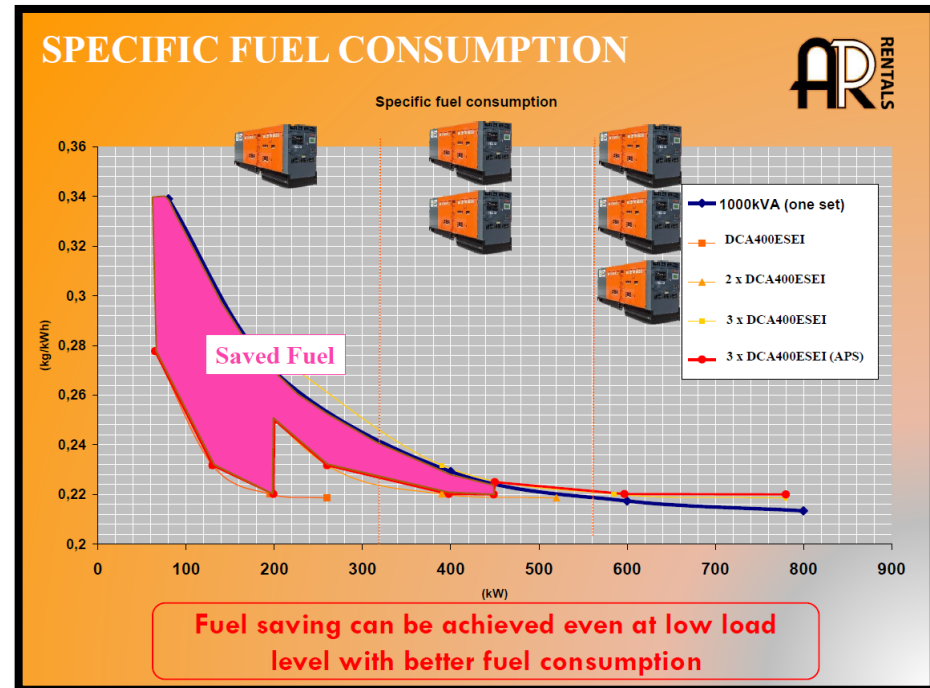

Environmental Friendliness

Efficiency

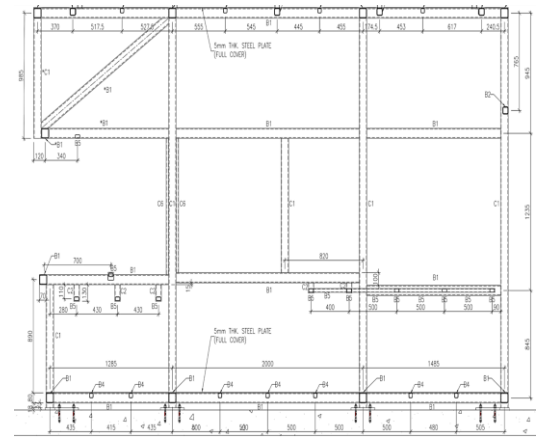

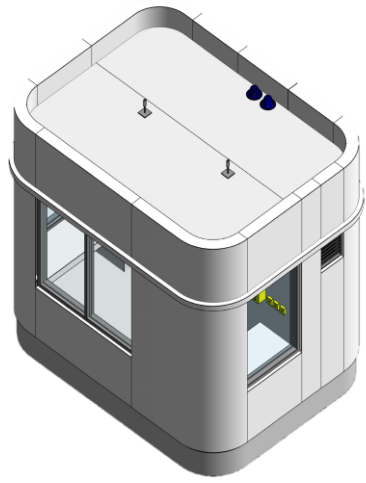

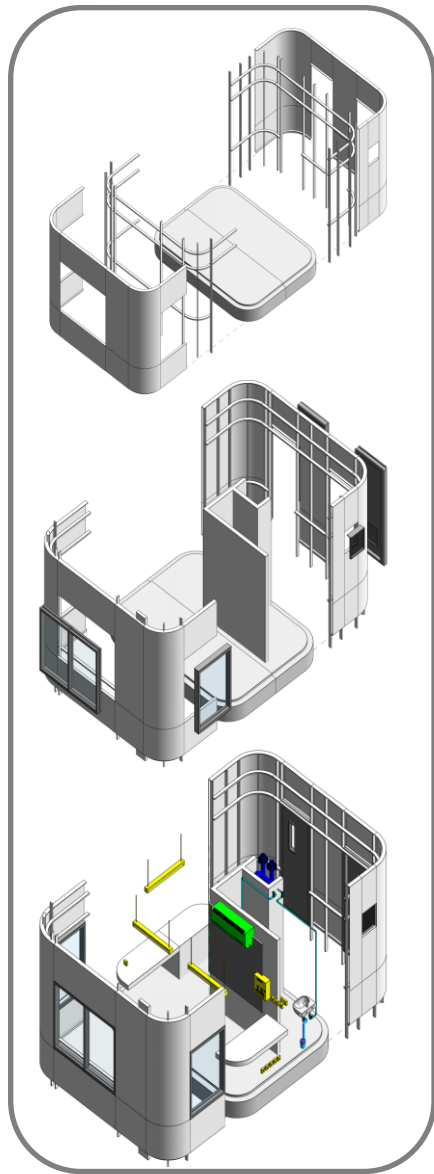

Consumption
of 30% of fuel

Modular Integrated Construction (MiC)

Inflatable & Flexible Noise Barrier

- More flexible to use in different locations
- Inflatable: reduce storage area and easy to carry
- Reuse materials from previous sites
- Also act as dust screen
