

Design and Construction of Redevelopment of Queen Mary Hospital, Phase 1 at Pok Fu Lam Road, Hong Kong

CONTRACT NO: SS F501 (PWP NO. 70MM)

Green Contractor Award 2022

CONTENTS

- 1. Mitigation Measures
 - a Noise Pollution Mitigation
 - b Air Pollution Mitigation
 - c Waste Mitigation

a Monitoring – Considerate Environmental System Noise Pollution Mitigation

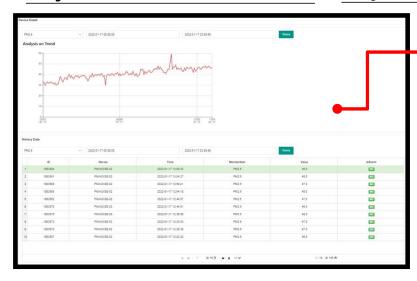

Monitored ItemsConsiderate LevelAction LevelNoise Level65db70db $PM_{2.5}$ $90\mu g/m^3$ $100\mu g/m^3$ PM_{10} $65\mu g/m^3$ $75\mu g/m^3$

Adjacent to A&E of Block J

Adjacent to LO of Block K

"Considerate Environmental System", which includes noise & dust IoT sensors, is installed to ensure "nuisance-free construction". Noise level and concentration of particulates in air would be full-time monitored at cloud-based platform and feedback in Care and control center. Alert would be issued if any detected figures exceed the preset standards.

Air Pollution Mitigation

b Wide Adoption of Dust-Free Appliance During Dusty Works

Wireless and dust-free electrical appliances, i.e. connected to bag filter, are widely adopted on site and must be used for dusty works, e.g. timber formwork fabrication.

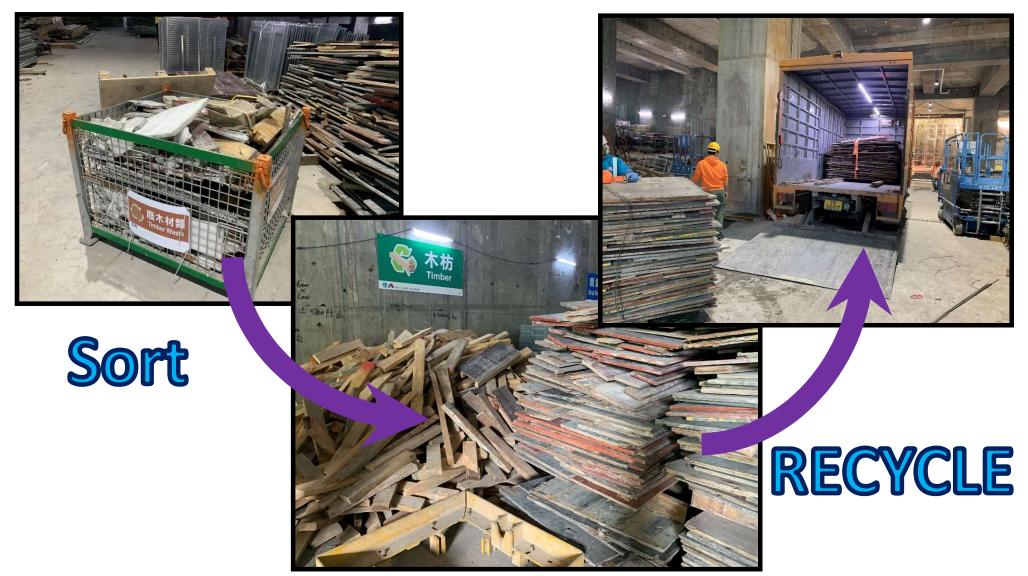

Waste Pollution Mitigation

C Aluminium formwork to reduce use of timber formwork

Waste Pollution Mitigation C Timber Recycling

From Superstructure Works

Unusable Timber is collected and recycled for using e.g. fuel, recycle wooden floor tile, of other sustainable projects

Waste Pollution Mitigation

c Housekeeping and 5S Management of Construction Materials

Sorting facility is provided in order to facilitate the reuse of the formwork accessories including couplers and plastic wall tie. Thus, the wastage of such material can be effectively reduced.

Waste Pollution Mitigation

c Provision of Adequate Water Station to Workers

Mobile Water Stations have been provided on Working area and LO

Bluewater® Station, which provides purified water (i.e. reduced 99% contaminants) to the workers, has been installed and operated on-site.
